

ALARM FOR YOUR MAINLINE FULLPORT BACKWATER VALVE

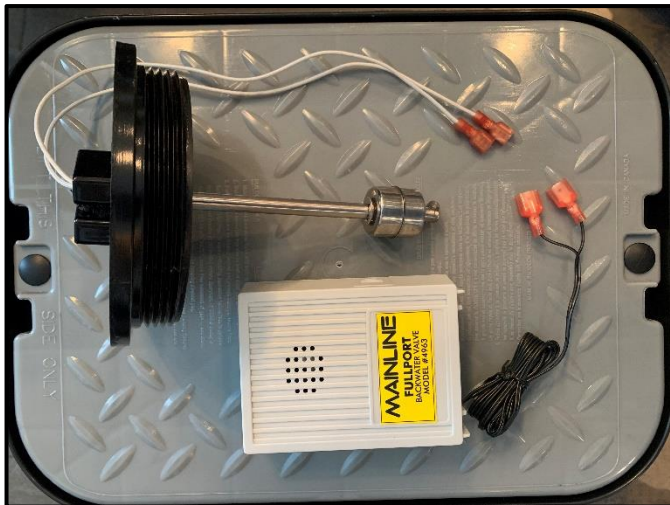

- KNOW WHEN YOUR SYSTEM IS BACKED-UP -

Model ML9V-BW

Reliable stainless steel float sensor technology (detects a back up quickly as water backs up float sensor is activated sounding the alarm)

110 dB alarm can be heard throughout the building – reliable solid state circuitry – 9-volt battery sounds alarm for up to 3 days and comes with a 6-ft cord

Cleanout with sensor replaces any existing cleanout – place alarm in desirable location (extend wires if necessary)

Manufactured by Mainline Backflow Products

* Sensor can be wired to building alarm system or other wireless alarm products
