Fullport Backwater Valve

BACKWATER VALVE

The ML-4963 valve has a patented 'normally open' design to allow for free circulation. The clear lid provides ease for visible inspections. The valve has a built-in main sewer cleanout for rodding and maintenance.

PART #	MATERIAL	SIZE
ML-4963A	ABS	4" DWV
ML-4963P	PVC	4" DWV

ACCESS BOX

PART #: PE-2013

The access box is a very useful accessory to the 4963 valve. Its dimensions of L: 20" W: 12 1/2" H: 16" provide access to the valve with ease.

ALARM

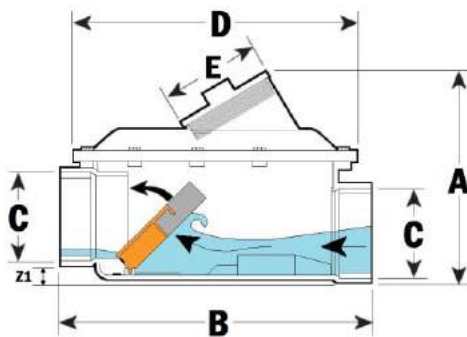

PART #: ML9V-BW

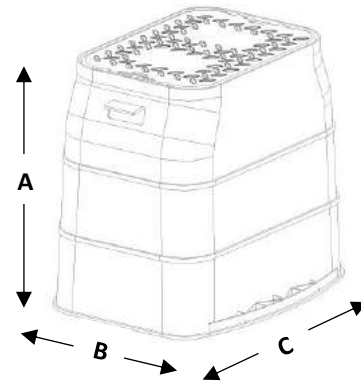

The alarm alerts building owners when valves activate during a sewer backup. Can be easily installed in any Mainline valve by simply replacing the cleanout.

**picture shown may vary from actual product*

DIMENSIONS

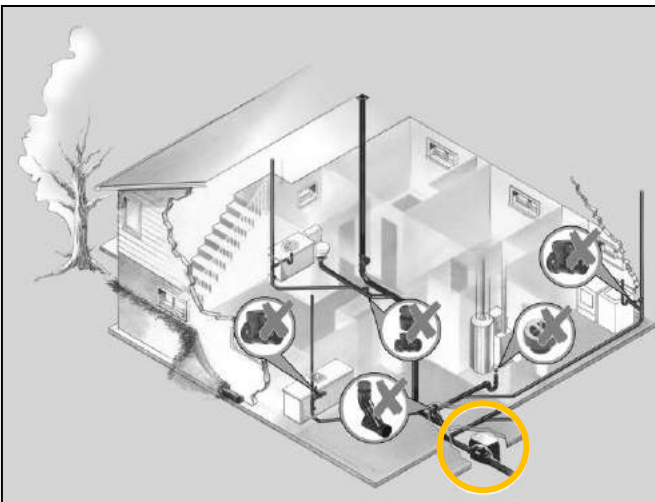

ML-4963	
A	11 1/2"
B	15 1/4"
C	4"
D	13 1/2"
E	5"
Z1	3/4"

PE-2013	
A	16"
B	12 1/2"
C	20"

Typical Home Installation

NEW!

Mainline Bladder Seal

PART #: ML-BB3430

The Bladder Seal is used to protect against radon gas, high water table, bug/insects etc. It also ensures clean valve access free of concrete, gravel, sand, mud and water over the valve.
