

# Pro-Flash<sup>TM</sup>

## BUILDING ENVELOPE SEALS

Patent Pending Technology

### Professional, Fast & Economical

Non-Breathable and Flexible

Weather Tight Elastomeric Seal

Score lines allow for multiple pipe sizes

US PATENTS:  
9,140,002 & 9,109,359

- Easily integrates into your building envelope system
- Flexible membrane easily forms around any contours of the building (trims, corners, etc)
- No caulking or taping

#### Pre-Wrap Installation:

1. Slide Pro-Flash over penetrations
2. Slide building wrap under bottom
3. Overlap building wrap over seal

#### Post-Wrap Installation:

1. Cut slit in building wrap above pipe
  2. Slide Pro-Flash into slit and over pipe
  3. Tape left and right sides and then top
- \*use recommended manufacturer tape\**
