

# TOP-GATE STRAIGHT-FIT BACKWATER VALVE

## SETTING A NEW STANDARD IN SEWER BACKUP PROTECTION

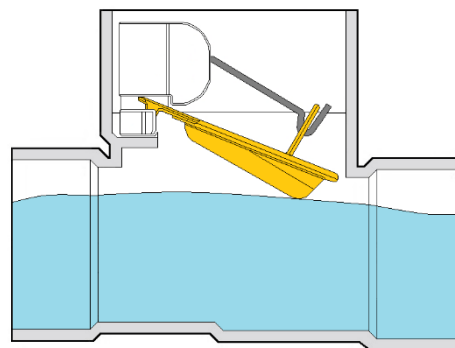

The Mainline Top-Gate Valve has been designed to provide complete protection and minimal maintenance with it's revolutionary features:

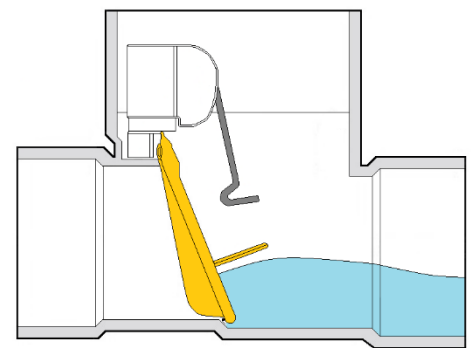

- Top Suspended Gate – stays forever clean and automatically closes during a backup
  - Once valve is closed it remains in operation as a check valve
  - Requires manual reset back to open position
- 
- Alarm – optional alarm will notify the owner when there is a backup

*Normally Open*  
*Normal Flow* →

*Gate Releases and Closes*  
*Reversal Flow* ←

*Closed Position*  
*\* operates as check valve*  
*until reset*

*Patent Pending Technology*
