

TOP CHECK FULLPORT BACKWATER VALVE

SETTING A NEW STANDARD IN SEWER BACKUP PROTECTION

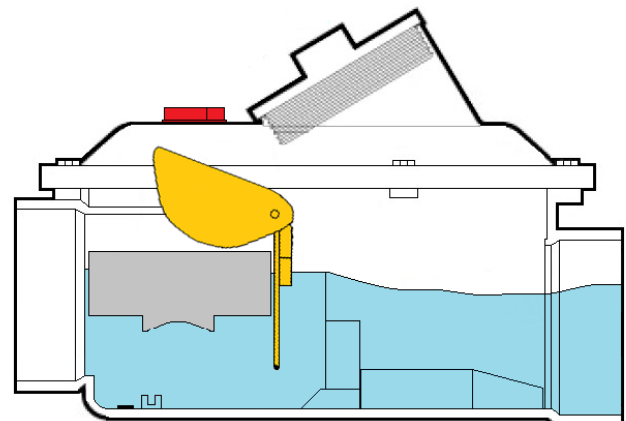

The Mainline Top Check Valve has been designed to provide complete protection and minimal maintenance with it's revolutionary features:

- Top Suspended Gate – stays forever clean and automatically closes during a backup
- Manual Sewer Shut Off – allows owners to manually close their valve
- Built-in Main Sewer Cleanout – provides an easy access for rodding of the sewer
- Clear Top – valve can be easily inspected
- Alarm – optional alarm will notify the owner when there is a backup or the valve requires cleaning
